

AGIP Novecento Additivo Benzina

APPLICATIONS

AGIP Novecento Additivo Benzina is a gasoline additive for the protection of valve guides and seats of vintage cars engines without catalyst. It protects valve seats from degradation:

- Creates a lubricant film to reduce valve seat wear
- Avoids deposits formation on gasoline injection system
- Lubricates the head of engine cylinder

CHARACTERISTICS

Properties	Method	Unit	Values		Typical
			Min	Max	
Density at 15°C	ASTM D 4052	kg/m ³			810
Viscosity at 40°C	ASTM D 445	mm ² /s		7	
Potassium	ASTM D 5185	mg/kg	1000		

HANDLING INFORMATION

- Add a bottle of 125 ml per 300 liters of gasoline.
